

NOTE:
Cross sections are interpretations based on interpolation between available boring logs. Actual subsurface conditions may vary from those depicted. Bedrock elevations based on geophysical data - Golder Associates, 1993.

0 250 500
Horizontal Scale in Feet
Vertical Exaggeration = 5x

LEGEND

| | | | |
|--------|---|--|-----------------------------|
| GR98-6 | Boring ID number | | Sand and gravel |
| | Top of wet/saturated zone encountered during drilling | | Silty zone |
| | Water level measured 3/99 | | Bedrock surface (estimated) |
| | Screen interval (wells) | | Uncertain contact |
